Mrs. May's CHERRY PIE ORCHARD

Cherries have been scarce and high priced. Most families haven't had nearly as many as they wanted for fresh cherry pies and sauces and for home canning. *You can have plenty, all you want, enjoy them at their freshest and best . . . by planting trees of your own this year.* The first bushel you pick will more than pay for the tree.

By planting these three varieties you'll have long weeks with all the cherries you want. You'll be eating Early Richmond in late May. Improved Montmorency will ripen about 10 days later, and Yellow Glass 10 days later still. *We will send you improved strains, heavy rooted and well branched trees.* Order early.

A THING OF BEAUTY, TOO

An abundance of delicious fruit isn't your only reward for having cherry trees of your own. In full bloom a cherry tree is indeed a thing of beauty! It is an ornament worthy of planting for floral beauty alone. Bushels of fruit and beauty, too!

HOME PLANTING HEADQUARTERS FOR THE NATION

Thanks for a fine year . . .

We have had one of the biggest and best years in our history and I want to say "thanks" to all of you for your fine orders. Thanks, too, to the increasing number of you who send your orders early. You are a great help to us in maintaining good service.

About stocks . . .

I wish I could report that we will have plenty of everything for you. While shortages of nursery stock are easing up a little all along the line, I can tell you now there will be a long list of "Sold Outs" before the planting season gets

here. You will avoid disappointment and be entitled to the fine premiums listed on the opposite page if you send your order early.

My promise still stands . . .

For more than a quarter of a century I have guaranteed the satisfaction of my customers and each year I am proud to renew that promise. You can count on Quality, Dependability, and Honest Value when you send your order to me. I invite you to join the many thousands who make us their headquarters for plants and trees and seeds.

Earl May

My New "Right Hand Man"

I have been waiting a good many years to unload some of my work on my son, Edward, and now I am doing it. Ed graduated from the University of Nebraska and took some special Agriculture courses at the Iowa Agricultural College at Ames, Iowa. Then for nearly 3 years he worked in the Economic Section for the U.S. Embassy in Mexico. But he is home now, living with his family in Shenandoah, and I am giving some of my work to him as fast as I can. Ed is no stranger to this business, because he worked around here all the years before he went away to school; dug bulbs, wrapped packages, did a little broadcasting, and made himself useful in general. Along with his other chores I am going to ask him to write a few lines for this page. It is time he was doing some of that, too.

Dear Friends:

It is really nice to be back to renew acquaintance with the work and with the folks around the seed house. There are over 300 in our seed house family in our busy season and I was surprised that after being away so long I knew practically all of them. Some of the department heads have been with Dad about as long as he has been in business.

I know I have a lot to learn but some of the main things were drilled into me a long time ago. I mean the things about treating our customers fair, giving honest values, and being of as much service as possible to friends and customers of the company. As you can imagine, we had that for breakfast, dinner, and supper when I was still at home.

This season I will be working in the nursery department and will be glad to have your suggestions on how we can be of greater service to you.

Sincerely,

Edward May

My Nursery Guarantee

FIRST: I guarantee my Nursery stock to be absolutely TRUE-TO-NAME. If it proves otherwise, you can have your choice of Replacement Free or a Full Refund of the entire purchase price.

SECOND: I guarantee my Nursery Stock to be strictly high quality, exactly as described in this catalog. I further guarantee it to reach you in good, live, thrifty growing condition. If you are not completely satisfied when you examine it on arrival, return it at once at my expense and you can have your choice of Replacement Free or a Full Refund of the entire purchase price.

THIRD: My Nursery Stock is strong, heavy-rooted and vigorous. It is dug and handled and packed with the utmost care. But, if it fails to grow for you, I will replace it at half-price the following season. I can't control weather conditions and other factors which might affect its growth, but I will share the loss with you and meet you half way. You must report your losses to me by October 1, 1947.

Below is a picture of the Certificate of Nursery Inspection showing that my Nursery Stock is fully inspected and that my raspberry plants are doubly inspected for virus diseases. This Certificate and my Nursery Guarantee, above, are your assurance of Real Quality and Complete Satisfaction.

PREMIUM NO. 4

PREMIUM NO. 5

PREMIUM NO. 6

Early Orders are going to be a great help to us this year and I express our appreciation of them with these premiums. Even though the nursery stock isn't shipped until planting time, we can get all the "book work" done well ahead of the last minute rush. This really makes a saving for me, in worry as well as work, and so I am glad to say "thank you" for early orders with these premiums. If you send your nursery order reasonably early, you are welcome to your choice of the premiums on the schedule listed below. (These premiums limited to orders from this catalog.)

You are entitled to more than one premium with the larger orders. You can have them alike or assorted. Please be sure to write your choice of premiums on your order; otherwise, we will not know what you want and none will be sent. I may run out of some of the premiums as the season gets farther along, and in that case I reserve the right to send you my choice of the premiums.

No. 1.—1 Climbing American Beauty Rose Bush. Worth 70c.

No. 2.—2 Regal Lily Bulbs. Worth 60c.

No. 3.—Red Jonathan Apple Tree (3 ft.) Worth 65c.

No. 5.—1 Brilliant Red Phlox. Worth 35c.

Any 2 Premiums on Nursery Orders of 6.00 to 8.00

Any 3 Premiums on Nursery Orders of 8.00 to 10.00

ON EARLY ORDERS OF \$10.00 OR MORE FOR NURSERY STOCK

When your order for Nursery Stock from this catalog amounts to \$10.00 or more you can have either (1) any 4 of the Premiums above or (2) you can have a Black Hills Spruce, one of the finest of all Evergreen Trees. It is rich, dark green in color and makes a very shapely growth. It's rugged and extremely hardy. I will send you the 15 to 18 inch size, root wrapped. It represents a \$1.25 value. If you order \$10.00 or more worth of nursery stock, be sure you mark your choice of either any 4 of the premiums above or one of these lovely Evergreens. Postpaid to you at no extra cost.

EASY TO ORDER

Just list what you want on the enclosed order sheet or on any sheet of paper. Please write your name and address plainly, giving rural route or street address. Also, if your express station is different than your postoffice, list the express station, too.

Easy to Send Money

Your personal check is good with me, or you can send a Money Order or Bank Draft. If you send currency or coin, wrap it carefully and you should then register your letter. Every year thousands of my customers send me signed checks with the amount left blank to be filled in with the correct amount to cover the order. This works out fine for everyone because the checks are always filled out for the exact amount of the order and at the lowest prices in effect the day the order is received.

MOST THINGS POSTPAID

You will see that most everything in this catalog is delivered to you Postpaid. This represents a big saving to you. Some things too large to go by parcel post are quoted "Not Prepaid". We ship these by Express. But, since nursery stock goes at the low second class express rate, the charges you pay on such shipments are generally as cheap as freight, sometimes even less.

If your order includes some of the larger items which must go by Express and some which would be postpaid by us, then I will send the entire order by Express. This will avoid making two separate shipments.

For this privilege I will include some extra nursery stock which has a greater value than the additional express charges amount to.

All Prices Quoted Subject to Stocks Available. Prices in This Catalog Not Good After July 1, 1947.

BLUEBERRIES

Nothing like Blueberries for delicious pies and sauces! Truly a delicacy. And now you can grow your own. They thrive in an acid soil and need plenty of moisture. 6822. PIONEER. Early ripening variety which is hardy and produces an abundance of sweet, plump berries, practically seedless.

6820. JERSEY. Late bearing variety. A hardy, vigorous grower and heavy producer. Berries are large, plump of excellent flavor.

PICTURED ON THE OPPOSITE PAGE

ALL RED JONATHAN

6116. (Winter.) An improved strain. Blazing red all-over and it colors earlier for earlier picking and top prices. Same unbeatable Jonathan flavor and all around superiority. Bears young and heavily.

RED DELICIOUS

6108. (Winter.) "The finest red apple of them all" is the claim many Horticulturalists make for this one. Extra delicious, crisp, tender, juicy. Colors early and retains its crispness and flavor in good winter storage until May.

CRIMSON WINESAP

6115. (Winter.) A rich, wine-flavored, deep red apple. One of the best bakers and a good keeper. Our improved strain is vigorous growing and heavy bearing.

YELLOW DELICIOUS

6107. (Winter.) Finest flavored of them all. Large, crisp, and firm. Many claim it is the heaviest bearer of all commercial varieties. Hardy, too, and gets into bearing earlier than most of the apples.

YELLOW TRANSPARENT

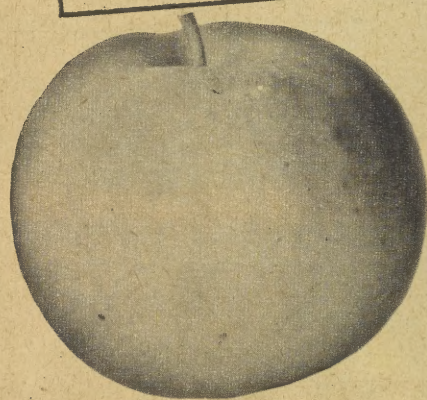

6113. (Summer.) Best of the early apples, and the finest of all for apple sauce. Ripens in July. A very heavy bearer and starts at 3 to 5 years old.

WEALTHY

6105. (Fall.) Extra large, yet the flesh is tender and delicious. Noted for its hardiness and long life. Ripens bright red in September and can be used weeks earlier. Bears young and heavily.

WHITNEY CRAB

6124. (Late Fall.) Largest red crab apple. Excellent for eating, canning, and pickling. A heavy cropper, very hardy, and bears young.

EARLY HARVEST

6134. (Midsummer.) You all know this fine summer apple. It isn't the biggest one by any means but it ripens in July when you are hungry for apple pie and sauce. Mighty fine eating fresh from the tree, too.

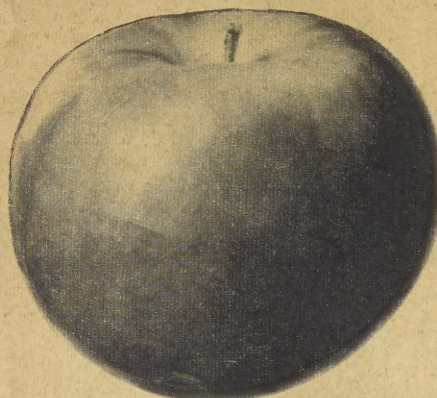

ALL RED DUCHESS

6102. (Early Fall.) The improved Van Buren strain, twice as red as the old striped Duchess. Large fruit is ideal for pies, dumplings, and sauce. An early bearer, often starts third or fourth year. Hardy north to Minnesota line. A dwarf-like grower ideal to plant between other trees.

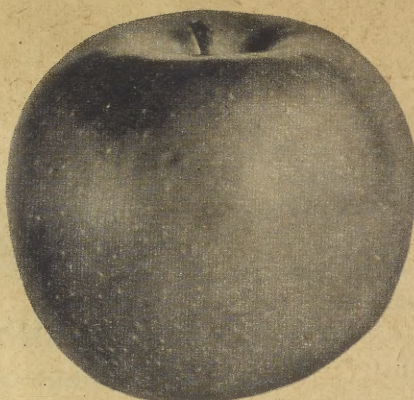

ANOKA

6119. (Summer.) One of the finest Summer apples. Will often start bearing the next year after planting. Apples are large, yellow, streaked red, and ripen in August. But they are fine for pies weeks before they ripen. Extremely hardy, grows ever where.

LATE JONATHAN

6132. SECOR. (Late Winter.) A bright cherry red, redder even than Jonathan. Fine flavor and quality, too. Starts bearing about the 3rd or 4th year. Very hardy even up into Minnesota. (One of the newer originations from Iowa State College.)

GRIMES GOLDEN

Apple Pie . . . Apple Sauce Baked Apples . . . Strudel

We all love apples and the many delicious dishes made with apples. But, lots of folks are not enjoying them very often . . . because apples have been very expensive and scarce. Even a small grocery sack of apples takes a big bite out of a dollar bill. The answer is—

Plant apple trees this year and grow your own. Have plenty, have all you and your family want for long months at a time. It's the way to an abundance of this luscious fruit . . . at a very small fraction of what you'd pay "the other fellow".

Years of selective propagation put Earl May's Apple Trees definitely in the superior class. *Bud selection has been made for parent stock which is truest-to-type, fruits earliest, and bears the most and finest apples. These trees are repeatedly cultivated and trimmed as they grow to develop heavy root systems and good branch structure. They are superior . . . in size and all-around quality.* They are big and sturdy and husky. Thousands of my customers will tell you "the best I ever saw". Order early so you plant them early for faster growth and earlier fruit.

CONCORD

6601. The all-time favorite grape because it is such a heavy bearer and so hardy. The clusters of glossy black fruit are uniformly large and wide. They hang on until mid-October and are extra sweet and juicy. For over 100 years, Concord has proven its heavy yielding ability and complete hardiness. While Concord is essentially a northern grape, it can be grown in the South, too. I'll send you healthy, heavy vines from outdoor grown stock. Guaranteed to please you.

QUINTUPLET APPLE TREE

Here is one of the miracle achievements of Horticulture! A single tree from which you can pick 5 separate and distinct varieties of Apples. *You can enjoy the many fruits of a whole apple orchard even though you have room for only one or two trees.* How is the Quintuplet "Apple Orchard tree" produced? Five expert budders are assigned to one row of trees. Each man carries buds of only one variety and inserts one bud in each tree. When these five budders have finished the row, each tree has those five varieties budded into it. Since each bud makes its own separate limb growth, they will produce the exact variety of fruit which was budded on. *Plant one or two of my Quintuplet Orchard trees and you will really have as many or even more kinds of apples than are produced in most home orchards.*

6126. When you plant my Standard Quintuplet Apple Orchard tree, you pick (1) **Wealthy**, an early Fall all-purpose apple; (2) **Yellow Delicious**, late Fall eating and baking apple; (3) **All Red Delicious**, finest of all eating apples; (4) **All Red Jonathan**, greatest all-purpose apple, and (5) **Crimson Winesap**, fine for eating and cooking and one of the best winter apples.

You'll find room for nut trees and fruit trees. Plant them this year. In the years to come they'll save you dollars for every cent they cost you.

The New Larger THOMAS BLACK WALNUT

A wonderfully improved new strain which bears much earlier and has larger nuts with a softer shell almost as easily cracked as the English Walnuts.

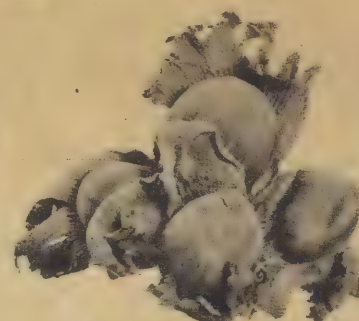

6900. The picture above was taken on my farm when my Thomas Black Walnut tree was 4 years old. The tree yielded a bushel of nuts. The year before it had about $\frac{2}{3}$ of a bushel and the year before that about $\frac{1}{2}$ bushel. How's that for early bearing? **And, friends, look at the size of the kernel, larger than a half dollar. Best of all, the shells are soft, easily cracked.** It will grow in any state in the Union and I urge you to get them started on your place this year. The supply is limited. So, order yours extra early. Sturdy 2 to 3 ft. Size Trees. **Each \$2.50, Postpaid.**

HANSEN BUSH CHERRY

6852. A very hardy, popular cherry. Grows in bush form. Originated in South Dakota. Excellent for jellies and preserves. Thousands of these are planted every year because they're sure to grow and bear fruit. The foliage is very attractive. Popular well into Canada. 2-Year Plants: 18 to 24 Inch Size, **Each 45c; 3 for \$1.29; 6 for \$2.35, Postpaid.**

It's GOOD and It's GOOD FOR HIM, too!

Bread and Jelly! Just what all youngsters need to keep them healthy and full of pep. But, in these days a lot of youngsters have been missing out on jelly and jam. Fruits have been so expensive. It seems they get scarcer and more costly each year.

The way to have plenty of fruit is to grow your own. Home grown fruits are fresher, more delicious. And you can have them, pick an abundance of fruits for years to come, for just the small cost of a few bushes and trees. Plant fruit this year!

A complete 32-page Planting Guide is sent free with each order for nursery stock.

HORSERADISH

(Bohemian)

6859. Here is something that every one of you will want. Plant a few roots. Just dig up some and grind it up and then put it on pork or beef and notice the flavor it makes, particularly if it is fresh from your own garden. A half dozen roots are sufficient for a moderate supply, but a dozen will be generous for the average family. Spreads quite rapidly, too, making more roots in the ground for you. I recommend that you plant the crown plants. They will be useable roots for you the first year.

**Crowns: 3 for 45c; 6 for 79c;

A Treasure In Goodness!

Berry Preserves! A treasure in every household. But they've been scarce and expensive. Enjoy all you want, at hardly any cost . . . by planting your own patch this spring.

THORNLESS BOYSENBERRY

6801. Just think of wine-purple berries 1½ to 2 inches long and an inch thick. Imagine the delicious flavor of the Loganberry, Raspberry and Blackberry. That's what the Boysenberry is—a 3-way cross. The result is a huge berry, juicy and luscious, and almost seedless. They bear very heavily, start the year after planting and continue for years. Can't be beat for pies, jelly, jam, preserves and is a rare treat eaten fresh with cream. Hardy, too, and easy to transplant. My strong, vigorous plants will please you 100%. In northern latitudes, mulch lightly with straw in the winter. (Complete planting instructions free with each order.)

Earl May's PLUM THICKET

Plums like company of their own kind. They need company, too, because it is cross pollenization that makes great yields. Every twig becomes loaded, the branches bend with the weight. That's the result of planting several varieties, including some good pollenizers. I have selected 5 of the finest and two of them (Sapa and Waneta) are the extra pollenizers you need. Plant them and have lots of luscious, juicy fruit.

TANGY, TART and DELICIOUS

Plum Butter

Plum Jelly

Plum Pudding

No reason why you can't have plenty of plums for all the good things they make. A few trees and you'll be picking plums by the basketful. The first big yield will more than pay for the cost of your trees. From then on, for years to come, you'll have an abundance of fruit and the only cost will be your time in picking it.

Plums are the hardiest, most dependable of fruits. The newer varieties listed here have a higher sugar content, are larger, juicier, and bear heavily. Plums require cross pollenization for heavy set of fruit. So, plant several trees, fairly close together. Plan abundant fruit for your family. Plant plum trees this year. Order early.

RED HAVEN

6415. **RED HAVEN.** A luscious beauty! Real early, yellow meated, almost solid red. A great big freestone with firm, sweetly delicious flesh. Hardy and vigorous for yearly bumper yields.

POLLY

6413. **POLLY.** A great big peach and a beauty, too. A perfect free-stone, white flesh, firm but very juicy. My customers say it is the most delicious peach they've ever eaten. Polly stays firm the way the home canners want their peaches to stay. It has completely proved its hardiness, standing 15 to 20 below zero. A consistent heavy yielder, bears when others fail. I certainly want you to have Polly Peach on your place.

6401. **CHAMPION.** Big, creamy-white freestone with red cheeks and a most delicious flavor. Among the hardiest of all peaches. A heavy bearer. Ripens about the middle of August.

6405. **GOLDEN JUBILEE.** New, early, yellow meated free-stone which ripens about 25 days ahead of Elberta. A large peach of fine quality in both flavor and texture. Colors to a beautiful yellow and red.

6406. **HALE HAVEN.** A great big, round freestone with extra sweetness and full flavor. Orange-yellow deeply overspread with red. About 12 days earlier than Elberta.

6404. **MAMMOTH HEATH CLING.** Top ranking cling and one of the largest, thriftiest and hardiest peach trees. A white peach, long the favorite for pickling and canning.

The trees are also strikingly beautiful in bloom. For sturdy, well rooted, heavy bearing trees, send your order to me. Plant at least 2 for cross pollenization.

6920. **NEW MANCHU.** Brought from northern China. Hardest of all Apricots and can be planted north into Minnesota. The fruit is large and the crop heavy.

Gorgeous velvety flowers in brilliantly beautiful colors! Gloxinias are truly a most wonderful flower. The blooms open to 2½ to 3 inches across and they come on week after week. And, they are about the easiest of all house plants to grow. You can plant your Gloxinia bulbs from February until late May and have a succession of flowers.

Use a 5-inch pot and get good rich sandy loam. Plant the bulb about one inch deep. Place it in a warm sunny window. Water it sparingly until growth appears and then water every day. After flowering the bulbs should be saved for planting another season and so on for many years. Here are four of the finest.

Earl May's

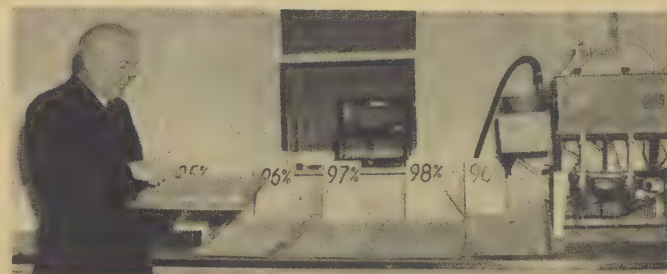

TRIPLE TESTED SEEDS

To assure you **BETTER VEGETABLES.**

To assure you **BIGGER YIELDS.**

To assure you **FINER FOODS.**

TESTED FIRST in our LABORATORY

Every packet, every pound of my vegetable seeds is **Laboratory Tested** to assure you High Germination. We know they are ready and "anxious" to grow before they are ever put in the packet and bags to be sent out to you. Literally, thousands of these tests are made each year in our laboratory. That's one reason why my customers report such good stands and such high yields from their gardens.

TESTED SECOND in our TEST GARDENS

Every year we plant scores of varieties of vegetables in our test gardens . . . old favorite varieties and new ones, too. In these tests we search out the thriftier, heavier yielding varieties. Time and again we discover a superior plant growing in an already established strain. From this superior plant our improved strains are developed. The name of the variety is the same but our tests show one strain to be very much better than the others. It is the better, the improved strains, we packet for our customers.

TESTED THIRD on our TABLES

Yes, that's the final and very important test . . . because you want the finer textured, finer flavored vegetables from your garden. We bring in truck loads of

vegetables from our test gardens and just pass them out to folks here at the seedhouse to try in their own kitchens. From all their reports I know exactly which varieties give the greatest taste satisfaction. Plant my seeds and enjoy the finer textured, finer flavored, really nicer varieties.

DETROIT DARK RED

Home Canning Favorite

205. (60 days.) In my estimation the best main crop and canning beet in existence. This one does away with the white or light colored zones in the flesh. It cans dark red with no browns or purples. Detroit Dark Red is a globe-shaped beet, a favorite everywhere. **Equally good for canning, pickling, or winter storage.** This is the one we use at home for our own use. **Pkt. 10c; 1/2 oz. 15c; ounce 25c; 1/4 lb. 75c, Postpaid.**

STOCK and POULTRY BEETS

216. MAMMOTH LONG RED MANGEL. (95 days.) The most widely known mangel. Yields up to 40 tons per acre—the large roots often weighing 15 to 20 pounds each. They frequently grow 2 feet or more long with half the beet growing out of the ground which makes them easy to harvest. Just rick them up in storage like stove wood. Skin bright red and flesh white with rings of pink.

1/2 oz. 12c; ounce 20c; 1/4 lb. 70c; lb. \$1.85, Postpaid

CULTURE: One ounce plants a 100 ft. row. Sow 8 to 10 pounds per acre in April and May in rows about 2 1/2 to 3 feet apart, covering the seed 3/4 to an inch deep. Thin plants to 8 inches. Dig before severe frost.

FOOD COSTS WORRY YOU?

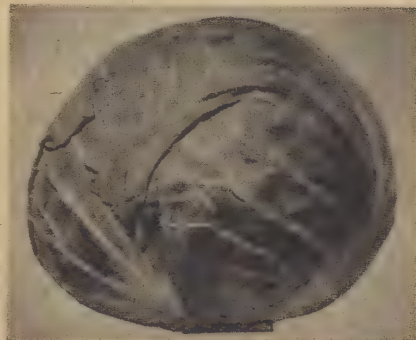

I'll bet they do. The way food prices have been raising the last three years it takes nearly twice as much money to feed a family. And the vegetables you do find in the stores just can't be as fresh and good and healthful as they are when picked right out of your own garden.

A few cents invested in garden seed will actually cut dollars off of your grocery bills. A packet of radish seed will bring you dozens of bunches of radishes. A pound of green bean seed will give you from a bushel to two bushels of far finer snap beans than you can buy.

Eat better food, at far less cost by planting a garden this year.

ONION PLANTS

Easy to plant. Easy to grow. And they make tremendous yields of big, mild, sweet onions.

Once you've seen and eaten fine big onions grown from plants, you'll always plant them. Light frosts and freezes, even a light snow, won't hurt them. So, you can put them out extra early to get a full growing season. Plant them about 1½ inches apart. The first time you thin them out for "green" onions. The next thinning for stewed onions. Then, let the rest go on to make you plenty for fall and winter use. Order at least 2 varieties: **WHITE BERMUDA** for the mildest you've ever eaten and **YELLOW SWEET SPANISH** for a good mild onion that keeps for months. Shipment made at proper planting time. Order early for early planting.

TOMATOES

RUTGER'S MAIN CROP (77 DAYS)

Best For Canning

765. The best large, red, main crop tomato for the Farm Belt. I introduced Rutger's over KMA 9 years ago. Friends are still writing me letters every year urging me to tell more folks about it. Without a doubt it is the most dependable big crop tomato today. The fruits are large and the quality is unsurpassed. The plants are strong and have just enough foliage to protect the fruits from sun scald. The large, bright scarlet tomatoes ripen from the inside out, evenly all the way through. The deep red, solid flesh is exceptionally fine for slicing and canning. No hard cores. They hold their large uniform size and keep bearing clear up until frost hits them in late fall. We had Rutger's Tomatoes this year from our own vines up until the tenth of October. You'll get a larger yield from Rutger's than any other variety I know of. An all around, all purpose, home garden tomato. Big Pkt. (over 800 seeds) 10c; 1/2 oz. 28c; ounce 45c; 1/4 lb. \$1.35, Postpaid.

Orange Jubilee (Main Crop)

New and Different and Certainly Delicious

767. (75 days.) Orange Jubilee is about the prettiest thing I ever saw. Ripens to a real orange color and the flesh is tangerine orange. Wonderful flavor, too, and good big size about like Rutger. Orange Jubilee has a very thick wall, very few seeds and is smooth and free from cracking. You are due for a real thrill and a real treat when you see and eat your first Orange Jubilee Tomato. Order it for sure.

Pkt. 10c; 1/4 oz. 35c; 1/2 oz. 65c, Postpaid

CULTURE: 1 packet produces 100 plants; 1 ounce about 1500 plants. Four or five weeks ahead of when you want to set plants in the garden start the seed in a hotbed or small box in the window. Plant in rows 3 inches apart, cover 1/2 to 3/4 inch deep. When plants are 1 inch high transplant to 1 inch apart each way. When all danger of frost is past set the plants in the garden 3 to 4 feet apart each way.

757. **MARGLOBE.** (77 days.) Always produces a fine crop of very uniform, smooth, round, solid fruits. Beautifully globe shape. Many pronounce this one of the best. Marglobe is a great big fellow, bright red, very productive, wilt resistant. The flesh is thick and meaty. Pkt. 5c; 1/2 oz. 23c; ounce 35c; 1/4 lb. 90c, Postpaid.

756. **PONDEROSA.** (88 days.) The great big tomato. Solid flesh, small seed cavities. Big yielder. Big Pkt. 10c; 1/2 oz. 40c; ounce 75c, Postpaid.

755. **RED OXHEART.** (90 days.) Enormous tapering fruit. Few seeds, "meaty" heart. Firm deep red flesh. Big Pkt. 10c; 1/2 oz. 40c; ounce 75c, Postpaid.

759. **WHITE QUEEN.** (78 days.) Delicate, mild, anti-acid. Ivory white skin and flesh. Pkt. 15c; 1/2 oz. 45c, Postpaid.

SIoux

Smoothest Large Early Tomato

762. (65 days.) You can count dozens of big smooth tomatoes on the Sioux vine above. The foliage was removed to show you what a wonderful set of fine fruit you can expect from this new variety. In our test gardens, every blossom cluster on Sioux vines set from 2 to 7 tomatoes (as many as 97 tomatoes on a single vine!). That means not only a great bumper crop but also a continuous supply of tomatoes. The fruit is large, extra smooth, and much more meaty-solid than the old varieties. Sioux ripens uniformly to a beautiful bright red (no green shoulders or spots) and the flavor is truly delicious. Be sure you have Sioux in your garden this year. You'll agree it is a great variety.

Big Pkt. 15c; 1/4 ounce 30c; ounce \$1.00, Postpaid. (See plant prices at the left.)

Sioux was developed by the University of Nebraska Agricultural College, as a result of breeding and selection by Dr. H. O. Werner. It was developed to provide a variety that sets fruit even under the unfavorable conditions of mid-summer heat and hot winds.

NEW BISON

764. (63 days.) Here is another grand tomato. Extra early with a heavy crop. A little larger than Earliana, deep scarlet, meaty and very few seeds. 758. **EARLIANA.** (66 days.) Extra early old reliable sort often called "Pink June". Deep pink flesh is solid. Bears freely, in clusters. Pkt. 10c; 1/2 oz. 30c; ounce 48c; 1/4 lb. \$1.35, Postpaid.

FARM SEEDS

You market your livestock more profitably when you have plenty of pasture and legume crops. You have better pasture, heavier legume crops when you plant Earl May's **QUALITY FARM SEED**.

ALFALFA

Nebraska Extra Fancy: Here is a lot of seed that will please the most exacting buyer as it is truly our choice of the best alfalfa produced in the great state of Nebraska this past summer. All big, bold, plump berried seed with a purity of 99.25% or better, free from foul weeds and a strong germination of better than 90%. This is alfalfa seed that will go out and produce year after year a tremendous crop of leafy succulent hay; hay that will put extra pounds on your livestock. **See the enclosed sheet for prices.**

ALSIKE

This is the only clover that likes wet soil. It grows and does best on low wet ground. Our seed comes from Oregon this year and is beautiful to see; rich dark green, almost black in color. With a purity of 99.25% and a germination of 90% it produces lots of rich nutritious hay and will set seed in the farm belt while building the soil with nitrogen. **See enclosed prices.**

TIMOTHY

This crop is still the old standby for pasture grass in the Middle West. All of our seed this year came from Iowa, as Iowa is one of the largest timothy seed producing states in the nation. Harvesting conditions this past year were excellent so that our seed is of the finest quality that we have seen for several years, containing very little unhulled timothy. The purity and germination is good, it contains no bad weeds. The germination will average 85% or above and the purity will go 99.50%.

We also have good rich mixtures of timothy and red clover, timothy and alsike . . . and alsike, timothy and red clover. **See the enclosed price list.**

RED CLOVER

Extra Fancy: we look for a real shortage to develop on red clover before planting time and therefore urge you to get your order in without delay. This extra fancy red clover is from the best seed produced in Iowa this year. Here again the purity is well over 99%, contains no bad weeds and the germination is well up into the 90's. For building the soil, producing hay or a seed crop you need not look further. This is your answer and it is priced right. We also have Mammoth Clover which is a very scarce item this year. **See prices enclosed.**

SWEET CLOVER (BIENNIAL)

Extra Fancy: For a soil builder at a low per acre cost sweet clover is the real answer. For the money it will put as much nitrogen in the soil as any clover you can plant and at the same time prepare the soil for another bumper crop of corn. Our white blossom extra fancy sweet clover is 99% pure, contains no bad weeds and germinates 90%. This seed was produced this last year in Minnesota. With our low prices it is a real economy to use sweet clover as a soil builder this year. **See the enclosed price list for a real bargain.**

BROME GRASS (BROMUS INERMIS)

This great grass has literally swept the Middle West by storm. No farmer should be without a brome grass pasture. Year in and year out this grass will carry more livestock per acre than any pasture grass we know. Brome grass seed is extremely short but we have good stocks of Lincoln, Home Grown, and Canadian grown seed. **See the enclosed price list for our low prices on new crop seed.** Don't delay. Send your order at once as supplies are limited.

HEAVY HAY AND PASTURE MIXTURE

If you are looking for low priced seed to sow in a new pasture or to thicken up an old one we recommend our heavy hay and pasture mixture. This seed is free from weeds and has a strong germination. Half grasses and half legumes it is scientifically prepared from natural mixtures to give the maximum of feed either for hay or pasture purposes. This mixture weighs 45 pounds per bushel and a bushel sows from two to three acres. **See price list enclosed.**

INOCULATION

Be sure to use Earl May's inoculation on all legumes. The cost is low and it pays big dividends in better crops. Prepares the soil for the coming corn crops.

HUBAM

The annual white sweet clover so popular in Iowa and Nebraska. Our seed was harvested this last summer on both sides of the Missouri River in Iowa and Nebraska. This great crop does in one year what it takes sweet clover two years to do. It completes its entire life cycle in one season. It builds the soil with ever needed nitrogen and produces a seed crop in the fall. Again our seed is 99% pure, 90% germination. Build your soil and realize a quick cash crop the same season. **See our low prices on the enclosed price list.**

SEED POTATOES

Again we are fortunate to have Blue Tag State Certified Red River Valley grown seed potatoes, free from disease. We can furnish Cobblers, Early Ohios, Warbas, Chippewas and Triumphs. **See prices on enclosed list.**

SELECTED EVERGREENS

ALL SELECTED EVERGREENS priced below are "Root Puddled". When dug the roots are immediately puddled and dipped in rich thick mud. This protects the finest roots. It is then wrapped in moist peat moss for shipment. You remove the peat moss and plant as you would any other tree.

BEAUTY HAS VALUE, TOO

It is wonderful to have lots of beautiful flowers in your yard to admire and enjoy, and to share with your friends in lovely bouquets. Flowers are a never ending source of pride and pleasure. But, there is more to it than just satisfaction and pleasure. There is, also, the matter of value. *It is a fact that a well-planted property is actually worth much more in cold, hard cash. A home which is admired for the shrubs and flowers which beautify it is a home which commands greater value in the eyes of all who see it.* Plant flowers and shrubs and trees this year. You can be sure they will increase the value of your property by more than the cost of the things you plant.

DOROTHY PERKINS CLIMBERS

These fine old-fashioned hardy climbing roses still bring endless delight to all who have them. They are thrifty and vigorous and produce literally hundreds of blooms. The flowers are not so large but the great clusters are massive.

BROWNELL

EVERBLOOMING SUB-ZERO

HYBRID TEA ROSES

A new family of roses produced especially to live and thrive year after year in sub-zero climates. **Brownell Sub-Zero Roses come through winters of 15° below zero without any protection at all.** But, if protection of a good mulch is provided, the bushes will be larger in the spring and produce more and larger blooms. With such protection Brownell Sub-Zero Roses will winter in areas where temperatures of 15° to 40° below zero are expected.

For size, form and colors the Brownell Sub-Zero Roses compare with the best. The blooms are large and, due to extra thriftiness and hardiness, the bushes bloom more abundantly and more consistently throughout the season.

For dependable year-after-year beauty and loveliness and fragrance, plant Brownell Sub-Zero Roses this spring. Order early so you can plant them early.
